## The AmericInn Lodging System

Oswego, Illinois

Wisconsin Dells, Wisconsin

Silver Bay, Minnesota

**A**t AmericInn, guests understand the value of waking up to their own alarm clock—and not the one next door. Recognized as the quiet lodging provider, the AmericInn Lodging System maintains a strong reputation as a luxury-economy and midscale market lodging contender. Since the first AmericInn opened in the early 1980s, the chain has grown steadily with more than 220 properties now open or under development.

AmericInn has earned its impeccable reputation as one of the fastest growing upscale limited-service lodging chains. Positioned as the quiet lodging experience with a unique product, market niche and savvy growth throughout the country, AmericInn has certainly exceeded expectations.

Founded on the integrity of consistent, quiet and solid masonry construction, the concept of Quiet Nights, Rest Assured was created to reflect AmericInn's construction integrity and consistency. Behind every good night's sleep at an AmericInn is a structure built to perform. With quiet rooms rated among the most soundproof in the industry, each AmericInn is built new from the ground up with masonry walls and concrete floors that make for a quiet night and quality sleep.

AmericInn properties are popular with business and leisure travelers because of spacious, well-appointed public areas and guestrooms. Recognized by the uniform architecture and signature amenities, AmericInn properties include a spacious indoor recreation area with pool and whirlpool—some with optional Splash Adventure Family Fun Centers. Oversized guestrooms and specialty suites provide guests with the desired "home away from home" atmosphere, while the two-story lobby highlights the enhanced continental breakfast and cozy fireside conversation

adventure

areas. AmericInn combines these features with friendly, efficient staff and a price that adds up to the finest lodging value in the hospitality industry.

The high level of quality found at every AmericInn stems from a strong foundation of construction standards and the fundamental belief in a quiet product. AmericInn takes pride in building sound hotels that offer guests a comfortable night's stay. As a developer and guest, AmericInn is not only a good choice, it is quite possibly the best decision you can make.
